AMERICAN GENETIC ASSOCIATION

Index to Volume 61

The Journal of Heredity, 1970

Abbott, U. K., *et al.*, Sex-linked coloboma in the chicken, 95.
Achondroplasia in Holstein-Friesian cattle, David M. Bowden, 163.
Additional evidence on the inheritance of cyclic neutropenia in the dog, J. E. Lund, G. A. Padgett, and J. R. Gorham, 47.
AGA-AAAS Symposium on human genetics and society, 184.
Alteration of growth and flowering in tomatoes by the jointless genotype, George C. Emery and Henry M. Munger, 51.
Ames, Ira H. and Jyotirmay Mitra, Another variation in the satellited chromosome of *Haplopappus gracilis*, 236.

Animal Genetics:

Aphanostigma piri, chromosomes and parthenogenesis, 73.
Cattle: blood cell chimerism and freemartinism, 15; gonadal hypoplasia and white coat color in Swedish Highland, 43; achondroplasia in Holstein-Friesian, 163.
Cockroach, genetic variability in the German, 123.
Dogs: cyclic neutropenia, 47; serum transferrins, 71; kinetic disorder in Scottish Terrier, 189; congenital ectodermal defects in miniature poodles, 196.
Drosophila birchii, chromosomal polymorphism, 23.
Drosophila pachea, chromosome phylogeny, 248.
Fish: pleiotropic effects of gene for golden color in rainbow trout, 8; correlation between seine escapability and growth capacity in carp, 153.
Fowl: coloboma in the chicken, 95; knobby down in turkeys, 119; haploid chicken embryos—evidence for diploid and triploid cell populations, 147; epileptiform seizures in chickens, 185; sporadic occurrence of parthenogenesis in poultry, 215; plumage color pattern in New Hampshire chickens, 279.
Fox, melanin, adrenalin, and fear responses, 81.
Frog, vertebral fusion, 174.
Hamster, gene interaction of coat patterns and colors in Syrian, 221.
Meriones unguiculatus, somatic karyotype, 158.
Mice: semilethal genotype at the *T* locus, 39; position of autosomal glucose-6-phosphate dehydrogenase on linkage group VIII, 53; degeneration of the retina, 62; linkage relationships of Strong's luxoid gene, 64; leukocyte production, 67; alcohol preference, 165; hypodactyly, 219; linkage of esterase-3 and rex in linkage group VII, 282.
Mink, fifth blood group factor at *A* locus, 79.
Mosquitoes: complete linkage in females of *Culex tritaeniorhynchus*, 59; red-spotted eye in *C. tritaeniorhynchus*, 135.
Parascaris equorum, trisomism and triploidy by heterofertilization, 122.
Progeny tests for recessive alleles by use of *a priori* probability, 55.
Rabbits: skeletal variations and malformations as effects of inbreeding, 3; audiogenic seizures, 107; strain variations as biochemical parameters, 261; diurnal variations as biochemical parameters, 265.
Rats: alcohol preference, 165; chromosomes of mammary carcinomas induced by 3-methylcholanthrene, 231.
Wright's inbreeding coefficient, computer calculation, 37.
Vole, hairless, 112.

Another case of split-foot mutation in two sibs, Ajit Kisor Ray, 169.
Another variation in the satellited chromosome of *Haplopappus gracilis*, Ira H. Ames and Jyotirmay Mitra, 236.
Asynapsis in *Ipomea gracilis*, Alfred Jones, 151.

Baimai, V., Chromosomal polymorphism in *Drosophila birchii*, 23.
Baker, Richard H. and Mohammad G. Rabbani: Complete linkage in females of *Culex tritaeniorhynchus* mosquitoes, 59; Red-spotted eye in the mosquito: an autosomal, conditionally codominant mutant, 135.
Basrur, P. K., *et al.*, Blood cell chimerism and freemartinism in heterosexual bovine quadruplets, 15.
Beaumont, John H., *et al.*, Gene interaction of coat patterns and colors in the Syrian hamster, 221.
Bennett, E. B., *et al.*, Sex-linked coloboma in the chicken, 95.
Bennett, Hugh W. and Byrson L. Burson, Cytology and reproduction of three *Paspalum* species, 129.
Biochemical parameters of clinical significance in rabbits: I. Strain variations, R. R. Fox, C. W. Laird, E. M. Blau, H. S. Schultz, and B. P. Mitchell, 261; II. Diurnal variations, R. R. Fox and C. W. Laird, 265.
Blau, E. M. *et al.*, Biochemical parameters of clinical significance in rabbits: I. Strain variations, 261.
Blood cell chimerism and freemartinism in heterosexual bovine quadruplets, P. K. Basrur, S. Kosaka and H. Kanagawa, 15.
Bloom, Stephen E., Haploid chicken embryos: Evidence for diploid and triploid cell populations, 147; Corrigendum, 247.
Borgaonkar, D. S., *et al.*, DNA replication pattern of the Y chromosome in XYY and XXYY males, 35.
Bouwkamp, John C. and Shigemi Honma: The inheritance of five morophological characters in the tomato, 19; Vernalization response, pinnea number, and leaf shape in celery, 115.
Bowden, David M., Achondroplasia in Holstein-Friesian cattle, 163.
Burk, L. G. and T. J. Mann, Onset, prevention and restoration of male-sterile flower anomalies in tobacco: Interaction of the *Nicotiana repanda* plasmon and *N. tabacum* genome, 143.
Burk, L. G., Green and light-yellow haploid seedlings from anthers of sulfur tobacco, 278.
Burson, Byron L. and Hugh W. Bennett, Cytology and reproduction of three *Paspalum* species, 129.

Canine serum transferrins, R. W. C. Stevens and Mae E. Townsley, 71.
Chai, C. K.: Effect of inbreeding in rabbits: Skeletal variations and malformations, 3; Genetic basis of leukocyte production in mice, 67.
Chemical mutagenesis comes of age: Environmental implications, Marvin S. Legator, 239.
Chromosomal polymorphism in *Drosophila birchii*, V. Baimai, 23.
Chromosome knobs and resistance to *Heliothis zea* in maize inbreds, M. R. Wanjari and N. W. Widstrom, 171.
Chromosome phylogeny of *Drosophila pachea* and related species, Bernard L. Ward and William B. Heed, 248.
Chromosomes and a deviation from parthenogenesis in *Aphanostigma piri*, M. Wysoki and E. Swirski, 73.
Chromosomes of mammary carcinomas induced by 3-methylcholanthrene in rats, S. K. Majumdar and E. Douglas Rees, 231.
Clark, Frank H., Pleiotropic effects of the gene for golden color in rainbow trout, 8; Corrigendum, 132.
Clayberg, Carl D., Genetics and culture of a new laboratory plant, *Sinningia pusilla*, 11.
Cochran, Donald G. and Mary H. Ross, Genetic variability in the German cockroach, 123.
Cohen, Maimon M., The somatic karyotype of *Meriones unguiculatus*, 158.
Collins, Robert L. and John J. Hutton, The position of autosomal glucose-6-phosphate dehydrogenase on linkage group VIII of the mouse, 53.

Complete linkage in females of *Culex tritaeniorhynchus* mosquitoes, Richard H. Baker and Mohammad G. Rabbani, 59.
Computer calculation of Wright's inbreeding coefficient by Cruden's method, Francis H. F. Li and Thomas H. Roderick, 37.
Congenital ectodermal defects in miniature poodles, Victor J. Selmanowitz, Kent M. Kramer, and Norman Orentreich, 196.
Connelly, Maureen E., *et al.*, Gene interaction of coat patterns and colors in the Syrian hamster, 221.
Corrigenda: Frank H. Clark, Pleiotropic effects of the gene for golden color in rainbow trout, 132; Cylde Keeler, A new hereditary degeneration of the mouse retina, 146; Barry J. Klyde, Selection in mice for a change in viability of a semilethal genotype at the *T* locus, 146; Stephen E. Bloom, Haploid chicken embryos, 247.
Craig, Richard and Robert E. Henault, Inheritance of plant height in the geranium, 75.
Craig, R. M., *et al.*, Sex-linked coloboma in the chicken, 95.
Crawford, R. D., Epileptiform seizures in domestic fowl, 185.
Cuna Moon-child albinism, 1950–1970, Clyde Keeler, 273.
Cytology and reproduction of three *Paspalum* species, Byron L. Burson and Hugh W. Bennett, 129.

Dasgupta, Sanjoy and Manjit Singh Grewal, Inheritance of vertebral fusion in the skipper frog, 174.
DeFries, J. C., *et al.*, Heritability of alcohol preference in laboratory mice and rats, 165.
Dennery, Edmund B. and Adolph Hecht, Genetic basis of anomalous flowering in *Oenothera*, 199.
Dermen, Haig, *et al.*, Fertile hybrids from a cross of a variety of *Vitis vinifera* with *V. rotundifolia*, 269.
Dickson, W. M., *et al.*, The genetic basis of a kinetic disorder of Scottish Terrier dogs, 189.
Di-isotrisomic of a diploid potato, S. L. Lam and H. T. Erickson, 103.
DNA replication pattern of the Y chromosome in XYY and XXYY males, D. S. Borgaonkar, H. M. Herr, and J. Nissim, 35.

Effect of inbreeding in rabbits: Skeletal variations and malformations, C. K. Chai, 3.
Effects of sodium cyclamate on *Haworthia* callus cultured in vitro: development, differentiation, and the chromosomes, Shyamal K. Majumdar and D. J. Lane, 193.
Electrophoretic characterization of proteins in *Hordeum*, Robert G. McDaniel, 243.
Emery, George C. and Henry M. Munger, Alteration of growth and flowering in tomatoes by the jointless genotype, 51.
Epileptiform seizures in domestic fowl, R. D. Crawford, 185.
Erickson, H. T. and S. L. Lam, A di-isotrisomic of a diploid potato, 103.
Ethnic variations in incidence of the XYY anomaly, Kennedy McWhirter, 192.

Falk, Catherine T., A general solution to a genetic selection problem involving recessive lethals, 49.
Fattig, W. Donald, An XYY survey in a Negro prison population, 10.
Fertile hybrids from a cross of a variety of *Vitis vinifera* with *V. rotundifolia*, Haig Dermen, Frank H. Harmon, and John H. Weinberger, 269.
Fifth blood group factor at the *A* locus in mink, J. Rapacz, R. M. Shackelford, and H. Hasler, 79.
Forsthoefel, P. F. and T. E. Shenk, Linkage relationships of Strong's luxoid gene in the mouse, 64.
Fox, R. R. *et al.*, Biochemical parameters of clinical significance in rabbits: I. strain variations, 261; II. diurnal variations, 265.
Fromm, E., *et al.*, Melanin, adrenalin and the legacy of fear, 81.

Gene interaction of coat patterns and colors in the Syrian hamster, C. William Nixon, John H. Beaumont, and Maureen E. Connelly, 221.
General solution to a genetic selection problem involving recessive lethals, Catherine T. Falk, 49.
Genetic basis for plumage color pattern in the New Hampshire fowl, J. Robert Smyth, Jr., 279.
Genetic basis of a kinetic disorder of Scottish Terrier dogs, K. M. Meyers, G. A. Padgett, and W. M. Dickson, 189.
Genetic basis of anomalous flowering in *Oenothera*, Edmund B. Dennery and Adolph Hecht, 199.
Genetic basis of leukocyte production in mice, C. K. Chai, 67.
Genetic correlation between seine escapability and growth capacity in carp, Rom Moav and W. G. Wohlfarth, 153.
Genetic variability in the German cockroach, Mary H. Ross and Donald G. Cochran, 123.
Genetics and culture of a new laboratory plant, *Sinningia pusilla*, Carl D. Clayberg, 11.
Genetics of the virescent-4 mutant in cotton, J. E. Quisenberry and R. J. Kohel, 212.
Genic induction and maternal transmission of variegation in *Zea mays*, Dorothy Stroup, 139.
Genome affinities of four African diploid species of *Hibiscus* sect. *Furcaria*, Margaret Y. Menzel and Diana W. Martin, 179.
Gonadal hypoplasia and white coat color in Swedish highland cattle, J. J. Lauvergne, 43.
Gorham, J. R., *et al.*, Additional evidence on the inheritance of cyclic neutropenia in the dog, 47.
Green and light-yellow haploid seedlings from anthers of sulfur tobacco, L. G. Burk, 278.
Grewal, Manjit Singh and Sanjoy Dasgupta, Inheritance of vertebral fusion in the skipper frog, 174.

Haigh, Mary V. and Alma Howard, Mutations affecting cell morphology in *Osmunda regalis*, 285.
Hamill, D. E. *et al.*, Multiple molecular forms of peroxidases and esterases among *Nicotiana* species and amphiploids, 203.
Haploid chicken embryos: evidence for diploid and triploid cell populations, Stephen E. Bloom, 147.
Harmon, Frank H., *et al.*, Fertile hybrids from a cross of a variety of *Vitis vinifera* with *V. rotundifolia*, 269.
Hasler, H., *et al.*, A fifth blood group factor at the *A* locus in mink, 79.
Hecht, Adolph and Edmund B. Dennery, Genetic basis of anomalous flowering in *Oenothera*, 199.
Heed, William B. and Bernard L. Ward, Chromosome phylogeny of *Drosophila pachea* and related species, 248.
Henault, Robert E. and Richard Craig, Inheritance of plant height in the geranium, 75.
Hereditary hairlessness in the montane vole, Aelita J. Pinter and Allen K. McLean, 112.
Heritability of alcohol preference in laboratory mice and rats, Glayde Whitney, G. E. McClearn, and J. C. DeFries, 165.
Herr, H. M., *et al.*, DNA replication pattern of the Y chromosome in XYY and XXYY males, 35.
Hohenboken, W. D. and G. Nellhaus, Inheritance of audiogenic seizures in the rabbit, 107.
Honma, Shigemi and John C. Bouwkamp: The inheritance of five morphological characters in the tomato, 19; Vernalization response, pinnae number, and leaf shape in celery, 115.
Howard, Alma and Mary V. Haigh, Mutations affecting cell morphology in *Osmunda regalis*, 285.

Human Genetics:

Albinism, Cuna Moon-child, 1950–1970, 273.
Chemical mutagenesis, environmental implications, 239.
DNA replication pattern of the Y chromosome in XYY and XXYY males, 35.
Mastocytosis , a clinical evaluation, 91.
Selection, solution to a recessive lethal problem, 49.
Split foot in two sibs, 169.
XYY chromosome anomaly: survey in Negro prison population, 10; DNA replication pattern of the Y in XYY and XXYY males, 35; ethnic variations, 192.

Hummel, Katherine P., Hypodactyly, a semidominant lethal mutation in mice, 219.
Hutton, John H. and Robert L. Collins, The position of autosomal glucose-6-phosphate dehydrogenase on linkage group VIII of the mouse, 53.

Hutton, John J., *et al.*, Linkage of esterase-3 and rex on linkage group VII of the mouse, 282.
Hypodactyly, a semidominant lethal mutation in mice, Katherine P. Hummel, 219.

Inheritance of audiogenic seizures in the rabbit, W. D. Hohenboken and G. Nellhaus, 107.
Inheritance of five morphological characters in the tomato, John C. Bouwkamp and Shigemi Honma, 19.
Inheritance of inner seed-coat color in peanuts, V. A. Rodriguez and A. J. Norden, 161.
Inheritance of plant height in the geranium, Robert E. Henault and Richard Craig, 75.
Inheritance of vertebral fusion in the skipper frog, Sanjoy Dasgupta and Manjit Singh Grewal, 174.
Intergeneric crosses between sugarcane and maize: embryological studies, L. D. Vijendra Das, 288.

Jones, Alfred, Asynapsis in *Ipomea gracilis*, 151.

Plant Genetics:

Allium cepa, effect of LSD on chromosomes, 283.
Celery, vernalization response, pinnae number and leaf shape, 115.
Cotton, virescent-4 mutant, 212.

Geranium, inheritance of plant height, 75.
Haplopappus gracilis, variation in satellited chromosome, 236.
Haworthia variegata, effects of sodium cyclamate on development and differentiation of callus cultured in vitro, 193.
Hibiscus, genome affinities of four African diploid species, 179.
Hordeum, electrophoretic characterization of proteins, 243.
Ipomea gracilis, asynapsis, 151.
LSD, effect on chromosomes of *Vicia faba* and *Allium cepa*, 283.
Maize: genic induction and maternal transmission of variegation in *Zea mays*, 139; mutagen-induced dichotomous branching, 150; chromosome knobs and resistance to *Heliothis zea*, 171; embryology in intergeneric crosses between *Zea mays* and sugarcane, 288.
Nicotiana, see Tobacco.
Oenothera, anomalous flowering, 199.
Osmunda regalis, mutations affecting cell morphology, 285.
Paspalum, cytology and reproduction of three species, 129.
Peanuts, inner seed-coat color, 161.
Potato, di-isotrisomic, 103.
Sinningia pusilla, genetics and culture of new laboratory plant, 11.
Sugarcane, embryology in intergeneric crosses between *Saccharum officinarum* and maize, 288.
Tobacco: onset, prevention, and restoration of male-sterile flower anomalies, 143; multiple molecular forms of peroxidases and esterases among *Nicotiana* species and amphiploids, 203; green and light yellow haploid seedlings, 278.
Tomatoes: five morphological characters, 19; alteration of growth and flowering by the jointless genotype, 51.
Vicia faba, effect of LSD on chromosomes, 283.
Vitis, fertile hybrids from a cross between *vinifera* and *rotundifolia*, 269.
Zea mays, see Maize.
